### DESCRIZIONE CAPITOLATO / DESCRIPTION / DESCRIPTION / BESCHREIBUNG

■ La porta filo muro EVOLINE<sup>3</sup> ROTOTRASLANTE by Celegon può essere impiegata in caso di spazi ridotti o di esigenze particolari. Il sistema roto traslante costituisce un innovativo meccanismo, che consente alla porta di ruotare e traslare contemporaneamente dimezzando l'ingombro dell'anta in fase di apertura e chiusura. In fase progettuale la porta roto traslante offre soluzioni nuove ed alternative nella la soluzione dei problemi di gestione degli spazi interni, delineando nuove prospettive di arredo anche in ambienti di piccole dimensioni. Questo tipo di soluzione è particolarmente utile alle persone in carrozella o con difficoltà motorie, facilitate dagli ingombri ridotti della porta, dalla massima fluidità nel movimento e dalla decelerazione in apertura. Il telaio, nell'unica versione a tirare, è di semplice e veloce installazione. La presenza di zanche e reti, nel caso del telaio per muratura, e di profilo aggiunto, nel caso del telaio per cartongesso, permette di ottenere il miglior risultato durante l'installazione. Una volta installato, il telaio è pronto per essere tonalizzato come le pareti con vernici murali. In alternativa, il telaio può essere lasciato

■ The flush rotating door EVOLINE3 by Celegon can be employed in case of reduced spaces or in case of particular needs. The rotating system is an innovative mechanism; it allows to the door to rotate and to slide at the same time and in this way it halves the encumbrance of the door panel by opening and closing it. Already in the planning phase, offers the flush rotating door new and alternative solutions in projects where there are problems which involve the management of the interior spaces. This kind of door defines new furnishing perspectives, also in small environments. It is particularly useful to people in wheelchair or who have difficulties in walking, because the reduced encumbrance of the doors, the maximum fluidity in movement and the soft-opening system of this kind of door eases them under many aspects. The door frame is only in the pull-version available and its mounting is easy and fast. Thanks to the small plates and the net, when the frame is intended for a brickwall, or to the additional profile when for a plasterboard wall, it can be reached the best result during the installation of the frame itself. Once installed, can the frame be painted like the wall, using wall paintings. Alternatively can the frame

■ La porte affleurante rototraslante EVOLINE3 by Celegon peut être utilisée dans le cas où on a des espaces réduits ou en cas de besoins particuliers. Le système rototraslante est un mécanisme innovant qui permet à la porte de tourner et de coulisser au même temps et qui réduit de moitié l'encombrement du panneau de porte pendant son ouverture et sa fermeture. Déjà dans la phase du projet, cette typologie de porte offre des nouvelles solutions et des alternatives pour résoudre des problèmes due à la gestion des espaces intérieurs. Elle donne des nouvelles perspectives d'aménagement même dans des petits milieux. Cette porte est très utile aux personnes sur fauteuil roulant ou avec des difficultés à marcher ; ils trouvent des facilitations dans les encombrements réduits, dans la maximale fluidité dans ses mouvements et dans le système d'ouverture soft. Le châssis est dans la seule option à tirer. Son montage est facile et rapide. Il y a des agrafes pour les châssis sur maçonnerie et un profil supplémentaire dans le cas de châssis sur placoplâtre ; ça permet d'obtenir le meilleure résultat pendant le montage. Après le montage, le châssis peut être peint comme le mur, avec une peinture murale.

■ Die wandbündige ZIEHEN-SCHIEBETÜRE EVOLINE3 by Celegon kann im Fall von reduzierte Räume oder bei besonderen Erfordernissen benutzt werden. Das Ziehen-Schiebe System stellt ein innovatives System dar; es erlaubt der Türe, sich gleichzeitig zu drehen und sich auf einer Seite zu positionieren. Dadurch reduziert sich der Gesamtmaß des Türblattes um einer Hälfte, bei deren Öffnen und Schließen. Schon bei der Planung, bietet die Ziehen-Schiebetüre neue und alternative Lösungen an, vor allem wenn die Räume optimiert werden sollen. Diese Türe zeichnet neue Einrichtungs-Perspektiven aus, auch in kleinen Räumen. Empfehlenswert vor Allem im Fall von Personen auf Rollstuhl oder mit allerlei Schwierigkeiten beim Laufen. Eine grosse Hilfe wird durch die Fluidität in ihrem Handhaben dargestellt und durch ihrer Soft-Öffnung. Die Zarge ist nur in der Ziehen-Version erhältlich; deren Montage ist einfach und schnell. Durch die vorhandenen Netze und den Lochgitterstreifen bei Mauerwand oder den Zusatzprofile bei Gipskartonwand, ist das beste Ergebnis bei der Montage zu erreichen. Sobald montiert, kann die Zarge wie die Wand gefärbt werden, mittels den Wandmalereien. Als Alternative, kann die Zarge in ihrer ursprünglichen Farbe bleiben, da es sich

al naturale, poiché preverniciato di colore bianco. Squadri e distanziali consentono di mantenere il telaio sempre allineato, evitando deformazioni durante il trasporto e l'installazione. A seguito del montaggio del telaio andranno otturati i forellini che si presenteranno dopo la rimozione dei distanziali. La serratura magnetica, fornita di serie, sostituisce la serratura più tradizionale. Il pannello tambouré ha uno spessore di 50 mm ed è realizzato con materiali di prima scelta e con mdf da 5 mm. Il pannello viene fornito con trattamento di fondo per facilitare le successive applicazioni di vernici murali o similari. E' inoltre possibile richiedere il pannello laccato opaco o uniformante sabbiato. Telaio e pannello sono identificati da un numero di matricola per consentire la rintracciabilità nel caso di consegne separate e per facilitare l'assistenza post vendita.

be left in its original colour, considered that it consists on a white pre-painting. The removable spacers help to hold the frame aligned and avoid possible deformations during the transport and the installation. Once installed, there are little holes left, due to the points where the spacers were fixed. These little holes can be easily filled. The tamboured fold-door panels are 50mm thick; they are made of selected materials of first choice and of 5mm thick mdf-plates. The door panels are supplied with a priming treatment; this makes the following painting with wall or similar paintings easier. The door panels can also be supplied matt lacquered or with a sandblasted effect. The door frames and the door panels are identified through a matrix number, so that the traceability is guaranteed; this is very useful in case of separate deliveries and for the customer service.

um einer weissen Vor-behandlung handelt. Die Quer-und Distanzstücke dienen, damit die Zarge immer ausgerichtet bleibt und verhindern eventuelle Verformungen während dem Transport und der Montage. Nach der Montage bleiben kleine Löcher sichtbar, wo die Distanzstücke befestigt waren. Die Löcher können einfach ausgefüllt werden. Die Falt-Türblätter aus Wabe sind 35mm dick; diese sind mit Materialien von erster Wahl gefertigt und mit Mdf-Platten von 5mm Dicke. Die Türblätter werden grundiert geliefert; das erleichtert das nachträgliche Anbringen von Wandmalerei oder Ähnliches.
